

## TECHARMONIC CELEBRATES 15<sup>TH</sup> Year WITH OPEN HOUSE

*Customers invited to visit TechHarmonic HQ on Wednesday November 16th*

SAN JOSE, CA – 01 November 2011 -- TechHarmonic Inc, a leading full range provider of exhaust gas abatement solutions, invites our customers and partners to an Open House event at our new headquarters in San Jose on November 16<sup>th</sup> from 2:00 to 8:00 PM. The new facility, at 185 Martinvale Lane in San Jose, offers 10,000 square feet of office and manufacturing space. The event features technical seminars, product displays, refreshments, and door prizes, including a free iPad 2. TechHarmonic's technical and application experts will be available to discuss any specific abatement challenges customers might have.

"Our 15 years in business during turbulent economic times is a testament to the commitment we have to our customers and our innovative products and our customer's commitment to TechHarmonic products" commented Bill Delaney, President and CEO of TechHarmonic. "We will be showcasing products from our dry, wet and thermal/wet scrubber lines, including our newest product, the Monsoon water scrubber. Its compact size and extremely low water usage make it a great value for processes with water soluble by-products." Delaney continued "While competitor's abatement operations have either been relocated overseas, or closed, we remain in Silicon Valley to have access to leading edge technologies, supportive vendors and innovative customers."

Come to the Open House to check out what's new and how TechHarmonic can help solve your difficult process gas abatement challenges. To learn more and register for the event, visit the TechHarmonic website, [www.techarmonic.com/event](http://www.techarmonic.com/event) , for further details.

About TechHarmonic Inc.

TechHarmonic, located in San Jose CA, is a leading provider of a full range of exhaust gas abatement solutions for the semiconductor, solar, LED, nano-science and materials research and development markets in commercial, government and university facilities. The company's dry resin, wet and thermal/wet scrubber products allow customers to achieve environmental regulatory and safety compliance by effectively abating difficult process chemistries at lowest total cost.
